Digitalisation and the role of AI

Grant Wardell-Johnson | KPMG Global Tax Policy Leader

Rise of AI as an intrinsic part of digitalisation

1. Strengths: Reduce human error, speed, thoroughness, free capacity, reduce 'noise'
2. Weaknesses: 'Hallucination', discrimination, black box, security breaches, inadequate supervision
3. Receptivity: Informal sector, fraud, VAT, consumption taxes, PIT and CIT
4. Ethical concerns: Bias, insecurity, privacy, transparency, disproportionate consequences
5. Ethical framework: Consultation, pilots, traceability and explainability, rectification errors
